EXPERIENCE

Startup Project Sept 2023
HR Dashboard (currently working) HR Website designed to modernize and simplify the HR processes for organizations. This web-based platform is tailored to empower businesses with a comprehensive, user-friendly, and data-driven solution for talent management and human resources tasks

PROJECTS

Sudoku Solver The Sudoku Solver Web Application is a web-based tool that utilizes the backtracking algorithm to solve Sudoku puzzles. Sudoku is a popular number-placement puzzle that requires logical thinking and strategy to complete.

8 Puzzle Game The 8-Puzzle Game Web Application is a web-based project that utilizes the Breadth-First Search (BFS) algorithm to solve the classic 8-puzzle game. This interactive application allows users to engage with the puzzle and watch the BFS algorithm find the optimal solution in real-time.

Soil nutrient analysis (currently working)The Soil Nutrient Analysis Project is a pioneering initiative aimed at leveraging machine learning to optimize soil health assessments. By analyzing soil samples, this project seeks to provide farmers and agricultural professionals with invaluable insights into soil nutrient content, allowing for more informed decisions and precise fertilization strategies.

ACHIEVEMENTS

- HackerRank Badges
- Coding Ninjas Badges
